Abstract

This document includes helpful information for the installation and use of HP Insight Integration for Tivoli, Revision 5.0. For companies that implement HP servers and Tivoli enterprise management as key elements of their IT infrastructure, the HP Insight Integration for Tivoli is a comprehensive solution that simplifies systems management by integrating SNMP event and status indications for HP ProLiant servers into the Tivoli Enterprise Console (TEC), along with tasks that enable in-depth hardware data collection for ProLiant servers and integrated links to HP management tools.

What’s New in Insight Integration kit 5.0

Version 5.0 is the update to the “HP Insight Integration for Tivoli” version 4.9. This release provides the following updates to support HP Insight Management Agents up to version 8.60:

- Support for the following new events defined in MIB files in version 8.60:
  - 22075 – 22077
  - HPEVA_4
  - LHN_1 – LHN_21

For more details on the new event support, please refer to Appendix B and Appendix C in the HP Insight Integration for Tivoli, Revision 5.0 User Guide.

Installation of Insight Integration kit 5.0

This version of Insight Integration kit can be downloaded and installed on your system. To install a fresh copy of Insight Integration kit or to upgrade a previous revision of Insight Integration kit, follow the installation procedure as described in the HP Insight Integration for Tivoli, Revision 5.0 User Guide.

Limitations

Following are the limitations for this release of Insight Integration kit:

- Operating System support of HP Insight Integration Kit for Tivoli is limited by the OS support of Tivoli software as provided by IBM.
For More Information

To learn more about Insight Integration for Tivoli, refer to the following documentation:

- HP Insight Integration for Tivoli User Guide
